

# A R

## Formwork element with lattice girder construction

The formwork element type A R is a component that is used as permanent formwork in construction joints. In the version for rough joints, the formwork element is fitted with a lattice girder steel construction. It is made of DC04 steel and is suitable for installation heights of 80 to 600 mm. The product is 2400 mm long, but is also available in other lengths on request e.g. short or conical pieces.

| Artikel      | Typ               | W        |
|--------------|-------------------|----------|
| 340300013274 | Absch A R 80 140  | 2.330 kg |
| 340300013275 | Absch A R 150 200 | 2.330 kg |
| 340300013276 | Absch A R 210 250 | 2.560 kg |
| 340300013277 | Absch A R 260 300 | 2.780 kg |
| 340300013278 | Absch A R 310 350 | 3.220 kg |
