

Bases

Formwork for bases

To match our formwork tubes, we carry RAPIDOBAT® Bases. This formwork comes in a variety of versions and can be used to produce bases in short forming times. The possibilities for designing columns for either new or existing buildings are almost limitless with these formwork elements. The two-part shuttering elements are made of rigid polystyrene foam. Coating the formwork with a gel-like release agent means they can be easily removed once the concrete has hardened. This base formwork is 100 or 200 mm high. Other dimensions and shapes are also available on request.

Artikel	Typ	W
320300001974	Base 200 Ancona	0.000 kg
320300001975	Base 200 Messina	0.000 kg
320300001976	Base 200 Verona	0.000 kg
