

BKB 100

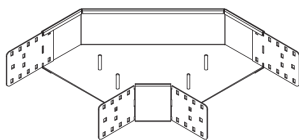

Floor duct bend, height=100 mm

The floor duct bend BKB 100 with integrated connectors allows the direction of cable routing to be changed horizontally by 90°. It is 100 mm high and 100 to 600 mm wide. It is made of sendzimir hot-dip galvanised steel. To dissipate vertical live loads, one separating strip must be installed in the floor duct for widths ≥ 300 mm and two separating strips for widths ≥ 500 mm. The bend is pushed into the floor ducts and then bolted in place.
