

BKB45 110

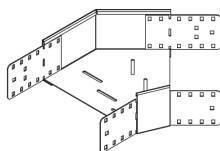

Floor duct bend 45°, height 110 mm

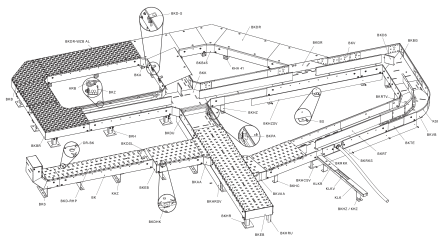

The floor duct bend BKB45 110 with integrated connectors allows the direction of cable routing to be changed horizontally by 45°. It is 110 mm high and 100 to 600 mm wide. It is made of sendzimir hot-dip galvanised steel. To dissipate vertical live loads, one separating strip must be installed in the floor duct for widths ≥ 300 mm and two separating strips for widths ≥ 500 mm. The bend is pushed into the floor ducts and then bolted in place.
