

BKHR SV

Floor duct side trim

BKHR SV floor duct side trim is used when the floor duct is elevated by BKHR floor duct brackets and is fastened using a BS 4.2x13 drilling screw. The side trims protect raised floor ducts from footfall and dirt and close off the floor duct system underneath. They are 108 mm high, 1000, 1500 or 3000 mm long and are made of sendzimir hot-dip galvanised steel.
