

BKK 110

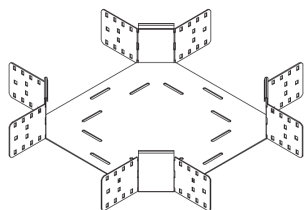

Floor duct crossing, height 110 mm

The floor duct crossing BKK 110 with integrated connectors is a formed part for horizontally crossing floor ducts. It is 110 mm high and 100 to 600 mm wide. It is made of sendzimir hot-dip galvanised steel. To dissipate vertical live loads, one separating strip must be installed in the floor duct for widths ≥ 300 mm and two separating strips for widths ≥ 500 mm. The crossing is pushed into the floor ducts and then bolted in place.
