

BKVBDR

Floor duct bend cover, variable with turning bolts

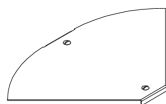

The BKVBDR variable floor duct cover is placed on top of the floor duct bend BKVB and protects cables and supply lines from flying sparks and other mechanical influences. It is 100 to 600 mm wide corresponding to the bend. The floor duct bend cover is made of sendzimir hot-dip galvanised steel and is not embossed. With a maximum compartment size of 200 mm, we guarantee a tested load capacity of 5.00 kN according to EN 50085-2-2. They come with pre-assembled turning bolts.
