

DR-BK

Floor duct twist lock

DR-BK floor duct turning bolts are used to fasten floor duct covers to floor ducts. The cover fastening option using BKDHK cover clamps or DR-BK turning bolts must be selected as an option and is particularly recommended for BKD-RHP floor duct covers. Knock out the corresponding slugs and insert the turning bolts into the hole. The DR-BK floor duct twist lock is made of sendzimir hot-dip galvanised steel.
