

EL
Fibre cement panel

The fibre cement panels EL are single-layer construction panels with a thickness of 4.50 mm. They are suitable for our cable ladders, especially for bulkheading in low or high voltage installations, for bushings or current transformer panels. The fibre cement panels have a smooth, easy-to-paint surface and a high volume. The material is impact-resistant, non-flammable as well as water-impermeable - properties that ensure their corrosion resistance even under heavy use.

Artikel	Typ	B	L	t	W
EL 20	Protection sheet EL 20	190 mm	1250 mm	4.50 mm	1.430 kg
EL 30	Protection sheet EL 30	290 mm	1250 mm	4.50 mm	2.180 kg
EL 40	Protection sheet EL 40	390 mm	1250 mm	4.50 mm	2.930 kg
EL 50	Protection sheet EL 50	490 mm	1250 mm	4.50 mm	3.680 kg
EL 60	Protection sheet EL 60	590 mm	1250 mm	4.50 mm	4.430 kg
