

FRS

Round-head bolt with square, DIN 603

The round-head bolt with square FRS (in line with DIN 603) is used in particular for fastening supporting structures to walls and/or ceilings. It is available in lengths from 16 to 50 mm and with threads from M6 to M12. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
