

GD-SW

Mesh cable tray storm protection bracket

If the mesh cable trays with covers are to be used outdoors, securing brackets are required for additional attachment of the mesh cable tray covers. The storm protection bracket GD-SW is suitable for the mesh cable tray cover GD. At least 6 safety elements must be used per 3 metres of cover according to the installation instructions. The necessary fastening set is included. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
