Mesh cable tray cover with turning bolts

The mesh cable tray covers GDR with turning bolts are suitable for mesh cable tray G 50 and G 100 and protect them from dirt, contact and moisture. They snap into place and interlock with the side rails. If the covers are to be used outdoors, additional securing brackets to protect against wind are required. In this case, the twist lock alone is not sufficient as a retaining element. The mesh cable tray covers are 60 to 600 mm wide and have a standard length of 3000 mm. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
