

GS
Slide sleeve

The sliding sleeve GS is a necessary accessory for the shear dowel HED-S in the stainless steel version. Using the sleeve eliminates the need for drilling through the formwork or subsequent concrete drilling. The sliding sleeve GS is made of stainless steel (A4) and enables the dowel to move longitudinally in the sliding sleeve. The standard lengths are 160 or 265 mm. Other lengths are available on request.

Artikel	Typ	L	D	W
550600012748	Gleithülse GS 20	160 mm	20 mm	0.324 kg
550600012749	Gleithülse GS 20 500	265 mm	20 mm	0.610 kg
550600012750	Gleithülse GS 22	160 mm	22 mm	0.343 kg
550600012751	Gleithülse GS 22 500	265 mm	22 mm	0.630 kg
550600012752	Gleithülse GS 25	160 mm	25 mm	0.420 kg
550600012753	Gleithülse GS 25 500	265 mm	25 mm	0.690 kg
550600012754	Gleithülse GS 30	185 mm	30 mm	0.423 kg
550600012755	Gleithülse GS 30 500	265 mm	30 mm	0.790 kg
