

JKO28

Profile bracket with support profile

JKO28 profile brackets are ready-to-install constructions for holding clamps, pipes and cable trays. They are therefore mainly used in technical building equipment. They are fastened to anchor channels or directly to the component with dowels. Special solutions are also possible upon request. The JKO28 profile bracket with cantilever profile K28/28 is made of hot-dip galvanised steel or stainless steel and is available in various lengths. It is paired with the bolts JD M6 - JD M12.
