

JL-DF+

The angled bracket JL-DF+ visibly fastens facings. At the same time, it completely covers both the air layer and the insulation between the façade and the building. It is made of stainless steel with corrosion resistance class III. It is available in different cantilever lengths and has corresponding load levels up to 3.2 kN.

Article	Type	H	L	G
JL-DF+250/3.2 DX		250 mm	250 mm	0.001 kg

- H: height
- L: length
- G: Weight per storage unit
