

JRH

Suspension loops JRH are suitable for invisible bracing above openings with a soldier course/brick-on-edge course or with a stretcher course. For this application, they are mounted on JVAeco+ N / NA / NU single brackets or JVAeco+ F / FAR brickwork support brackets. JRH suspension loops with a diameter of 4 mm made of stainless steel of corrosion resistance class III are used with a spacing of $\varnothing$ 250 mm.
