

# JVAeco+ EA

The brickwork support bracket JVAeco+ EA has general building authority approval and is available in the standard cantilever lengths of 130 or 150 to 390 mm and in several load levels. The JVAeco+ EA can be adjusted vertically by  $\pm 30$  mm and perfectly aligned using the teeth in the bracket head and a slanted slit plate. The anchor channel can be horizontally adjusted. This allows structural tolerances to be perfectly compensated. The JVAeco+ EA is made of stainless steel Lean Duplex in corrosion resistance class III. This ensures maintenance-free use.
