

JVAeco+ NAFT

The brickwork support bracket JVAeco+ NAFT has general building authority approval and is available in the standard cantilever lengths of 130 or 150 to 390 mm and in several load levels. The JVAeco+ NAFT can be adjusted vertically by ± 30 mm and perfectly aligned using the teeth in the bracket head and a slanted slit plate. The anchor channel can be horizontally adjusted. This allows structural tolerances to be perfectly compensated. The JVAeco+ NAFT is made of stainless steel Lean Duplex in corrosion resistance class III. This ensures maintenance-free use.

Article	Type	B	L	N	G
JVAECO+290 NAFT/7.0	JORDAHL Brickwork Support Bracket	80 mm	290 mm	+/- 30 mm	0.001 kg
