

JVAeco+ P

The brickwork support bracket JVAeco+ P has general building authority approval and is available in the standard cantilever lengths of 130 or 150 to 390 mm and in several load levels. The JVAeco+ P can be adjusted vertically by ± 30 mm and perfectly aligned using the teeth in the bracket head and a slanted slit plate. The anchor channel can be horizontally adjusted. This allows structural tolerances to be perfectly compensated. The JVAeco+ P is made of stainless steel Lean Duplex in corrosion resistance class III. This ensures maintenance-free use.

Article	Type	H	B	L	N	G
