

LGA 60

Cable ladder branch, height=60 mm

The LGA 60 T-shaped cable ladder branch allows the direction of the cable routing to be changed in the form of a branch. It is inserted between two cable ladders and enables another cable ladder to be connected at right angles. The cable ladder branch is suitable for cable ladders with rails 60 mm high and is 200 to 600 mm wide. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
