

LGVH 100

Cable ladder connector, horizontal, height=100 mm

Horizontal changes of direction can also be implemented without formed parts. To do so, LGVH 100 horizontal connectors are pushed onto the rails of the cable ladder previously cut to size according to the installation instructions and bolted in place. The connectors can be adjusted to the required angle. The pre-cut connecting rack is then mounted using the connectors. A branch can also be set up in this way. The connector LGVH 100 is 100 mm high corresponding to the cable ladder and 220 mm long. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.

Artikel	Typ	H	L	W
LGVH 100S	Cable ladder coupler, horizontal	100 mm	220 mm	0.471 kg
