Cable ladder crossing cover with turning bolts

PUK cable ladder crossing covers LKDR are suitable for all cable ladder crossings and protect them from external influences such as dirt and moisture. They are placed on top of the crossings and also have turning bolts for additional attachment. If the covers are to be used outdoors, additional securing brackets to protect against wind are required. In this case, the twist lock alone is not sufficient as a retaining element. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
