

MKD POT

Mounting clamp with potential equalization

The MKDPOT mounting clamp with pointed stud screw is used for clamping to coated steel beams where potential equalization must be guaranteed. The maximum load is 1.5 kN. The clamping range extends from 6 - 21 mm. The maximum thickness of the coating to be penetrated is 80 µm.

Artikel	Typ	H	B	L	M	MT	k	W
MKDPOT 21	Beam clamp for potential equalisation	42 mm	44 mm	43 mm	4 Nm	M8	6 - 21 mm	0.153 kg
MKDPOT 21 M10	Beam clamp for potential equalisation	42 mm	44 mm	43 mm	4 Nm	M10	6 - 21 mm	0.153 kg
MKDPOT 21 M6	Beam clamp for potential equalisation	42 mm	44 mm	43 mm	4 Nm	M6	6 - 21 mm	0.153 kg
