

PENTAFLEX® FBA

Joint tape connection

PENTAFLEX® FBA joint tape connection consists of a clamping device with sealing profile. FBA can be used to connect KUNEX® joint tapes to PENTAFLEX KB® elements. At the end piece of the PENTAFLEX® element, the FBA is connected to the joint tape with a bolted clamping device. An embedment depth of 30 mm is sufficient to withstand a test pressure of 5 bar.
