

PENTAFLEX KB® Corner

joint sheet for construction joints in corner areas

PENTAFLEX KB® Corner is a preformed single element made of galvanised sheet steel with a special coating for sealing construction joints in corner areas. It is used in combination with PENTAFLEX KB® and PENTAFLEX® FTS Eck. It is mounted using joint clips on the previously installed PENTAFLEX KB®. The corner element is watertight up to 5.0 bar in pressurised water.
