

RAA 35

Cable tray attachment branch, height = 35 mm

The RAA 35 cable tray attachment branch allows the direction of cable routing to be changed horizontally in the form of a branch. The side rail of the main cable tray is cut out at the point where the connection cable tray will branch off as specified in the installation instructions. The RAA attachment branch is positioned and bolted in place at this point. The VB floor connector and the connection cable tray can then be attached. The RAA 35 cable tray attachment branch is suitable for cable trays with sides 35 mm high. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
