

RBDR45

Cable tray cover with turning bolts

The cable tray bend covers RBDR45 are suitable for RB45 cable tray bends and protect them from dirt and moisture. They snap into place and interlock with the side rails and also have turning bolts for additional attachment to the bend. If the covers are to be used outdoors, additional securing brackets to protect against wind are required. In this case, the twist lock alone is not sufficient as a retaining element. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
