

RITR 60

Installation cable tray separating strip, height = 58 mm

The installation cable tray separating strip RITR 60, the heavy-duty RIS 60 installation trays and the heavy-duty RDS or RDSR covers allow cables and wires to be laid in a step-resistant system.. In addition, the compartments created in the same installation cable tray with different functions or voltages are physically separated from each other. The divider is screwed to the cable tray three times: approx. 100 mm away from both ends of the separating strip and in the middle. The installation cable tray separating strip RITR 60 is 58 mm high and 3000 mm long and is made of sendzimir hot-dip galvanised steel.

Artikel	Typ	H	L	t	W
RITR 60S	Cable tray barrier strip RTR 60S	58 mm	3000 mm	1.50 mm	3.321 kg
