RR 85

Cable tray reducer, height = 85 mm

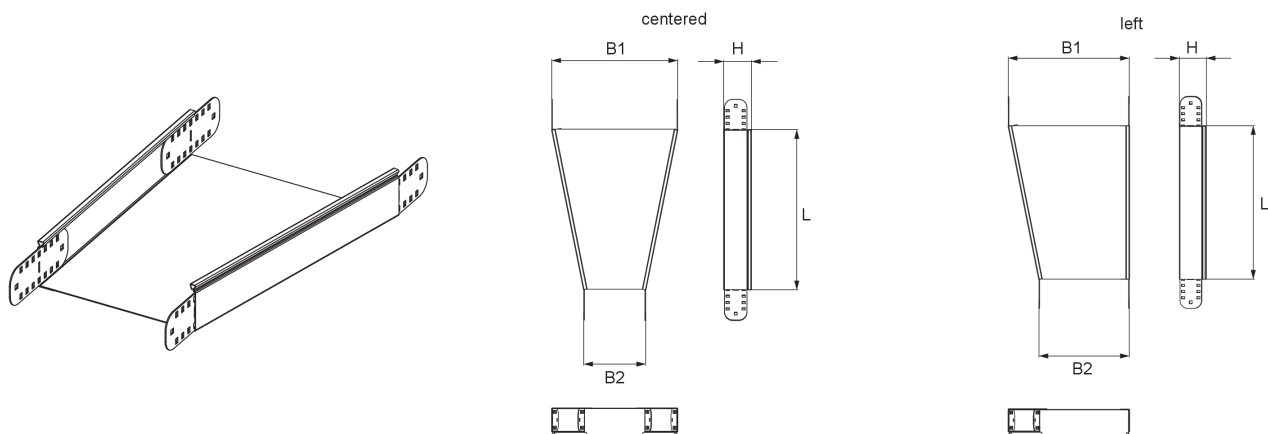

The cable tray reducer RR 85 with integrated side connectors enables the width of the cable tray to be reduced. It is available in three different designs: It can narrow towards the centre or on the left or right side. Specify the desired design (left, centre, right) and width when ordering. The entrance width is always reduced by 100 mm. The cable tray reducer has a standard length of 500 mm and is suitable for cable trays with sides 85 mm high. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
