

RTRV 35

Cable tray separating strip, variable, height = 33 mm

Cables and wires with different functions or voltages can be routed separately from one another using the variable cable tray separating strip RTRV 35. The separating strip is separated into segments. This makes it flexible and ideal for being installed in formed parts. Mounting bolts are included. The cable tray separating strip RTRV 35 is 33 mm high and 1000 mm long. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
