

RVB 35

Cable tray vertical bend, height = 35 mm

The cable tray vertical bend RVB 35 allows the direction of cable routing to be changed flexibly and vertically. It is inserted into the cable tray along with a REB cable tray end plate and bolted to the bottom and sides. The vertical bend RVB 35 is suitable for cable trays with sides 35 mm high. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.
