

SECUFLEX® SMT

Pre-applied waterproofing membrane for full-surface sealing

The SECUFLEX® SMT pre-applied waterproofing membrane is an HDPE waterproofing sheet with an adhesive layer and special granulate. An adhesive strip 75 mm wide is integrated in the membrane. The system is highly flexible, bridges cracks and has anti-tracking properties. Installing the pre-applied waterproofing membrane on construction sites is quick, easy and safe. The sealing membrane is 1200 mm wide and is 20 m long per roll.
