

SKLL

Clamping claw, light

The lightweight clamping claw SKLL is used to fasten cable trays and wide-span cable trays to steel beams. For the latter, wide-span side rail supports (WPHS) must also be used. The clamping range extends from 5 - 25 mm. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

Artikel	Typ	k	W
SKLL F	Clamping claw SKLL F	5 - 25 mm	0.062 kg

Artikel	Typ	k	W
SKLL E	SClamping claw SKLL E	5 - 25 mm	0.059 kg
