

SLVV

Ship cable ladder vertical connectors

To create vertical changes of direction, SLVV ship cable ladder vertical connectors are pushed onto the side rails of the ship cable ladder and bolted in place according to the installation instructions. The connectors can be adjusted to the required angle. The connecting rack is then mounted using the connectors. The vertical connector is 38 mm high corresponding to the ship cable ladder and 180 mm long. We provide components in various materials and surface finishes to ensure that a wide range of corrosion requirements are met and that additional protective measures can be taken.

Artikel	Typ	H	B	W
SLVV M	Ship ladder coupler, vertical SLVV M	38 mm	180 mm	0.000 kg

Artikel	Typ	H	B	W
SLVV B	Ship ladder coupler, vertical SLVV B	38 mm	180 mm	0.000 kg
