

STR 50

Vertical ladder separating strip, height = 33 mm

Cables and lines with different functions or voltages can be routed separately from one another in the same vertical ladder using vertical ladder separating strip STR 50. The separating strip is bolted to the ladder three times: in the middle and on the last rungs of the two ends of the separating strip. The separating strip STR 50 is suitable for all vertical ladders with the exception of LGG 60. It is 33 mm high and 3000 mm long. We provide components in various materials and surface finishes to ensure that the corrosion requirements are met for all sorts of applications.

Artikel	Typ	H	L	W
STR 50S	Seperating strip for vertical ladders	33 mm	3000 mm	1.267 kg
