

SWELLFLEX® RB

Rubber swelling tape with retardation layer

SWELLFLEX® RB rubber swelling tape with retarder layer is internally to seal joints. It is used in building components with high water penetration resistance against pressurised and unpressurised water and soil moisture. The swelling joint sealing profile is used in a number of areas, including system building construction, element construction, tunnel construction and pipe jacking.

Artikel	Typ	W
140100005105	Swell RB 18	0.190 kg
140100005107	Swell RB 23	0.220 kg
140100005108	Swell RB rund	0.280 kg

OPTIONALES ZUBEHÖR

SWELLFLEX® Mounting Channel, SWELLFLEX® Assembly Adhesive & Sealant

General building authority test certificate: P-1200/312/15 MPA BS
