

UBKPRVE

Corner connector

UBKPRVE components are connectors for screed-flush heavy-duty ducts. They are made of sendzimir hot-dip galvanised sheet steel in accordance with DIN EN 10346 and are rectangular in shape with two oval cut-outs. These components are used to bolt the side profiles together at joints with 90° bends. The connectors are 30 mm high, 90 mm long and are made of material 3 mm thick.
