

UDAEUM

Data connection module

UDAEUM components are data connection modules according to type Cat.6A iso A, RJ 45. These universal modules from the range of installation devices for underfloor systems can be inserted into standard keystone cut-outs. They have a slot that can be used for STP (shielded twisted pair) network cables, which shield against external interfering factors. The shielding housing of the installation modules is made of die-cast zinc.
