

UDKSEB

Claw, screed-flush

UDKSEB products are claws from the underfloor systems range. This accessory consists of a claw body and a matching button head screw. They are used in special applications when installing plastic or stainless steel installation units in screed-flush ducts. The claws are made of sendzimir hot-dip galvanised sheet steel in accordance with DIN EN 10346 and are available with a clamping range of 3 - 30 mm.
