

UEBSBMD 185V

Assembly cover, dummy, angular

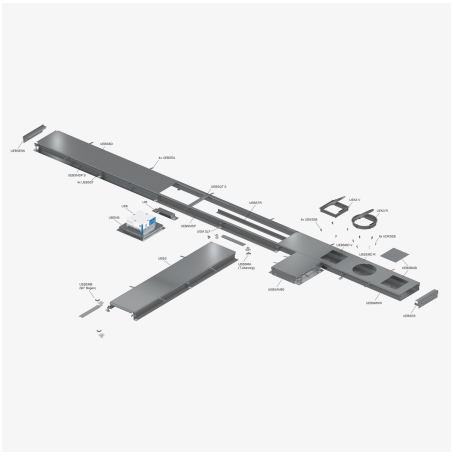

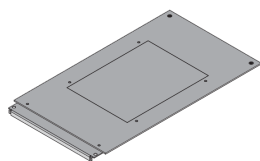

The UEBSBMD components are dummy assembly covers for screed-flush duct systems. These products are made of sendzimir hot-dip galvanised sheet steel in line with DIN EN 10346 and have round or square cut-outs of various sizes. The products are designed for typical office loads and can alternatively be combined with a dummy cover to accommodate two to three mounting boxes. The assembly covers are supplied with two galvanised (in line with DIN EN ISO 4042) countersunk sheet metal bolts BSS 4.8 x 16.
