

UEBSVMB S

Corner connector plate

UEBSVMB S components are corner connector plates for screed-flush ducts. These products are inserted into the duct profiles in addition to the corner connectors. They are mounted in the corners using the matching bolts to form the required fixing point. The connector plates are made of sendzimir hot-dip galvanised sheet steel (DIN EN 10346) and are 2 mm high and 40 mm across.
