

UGEAV2

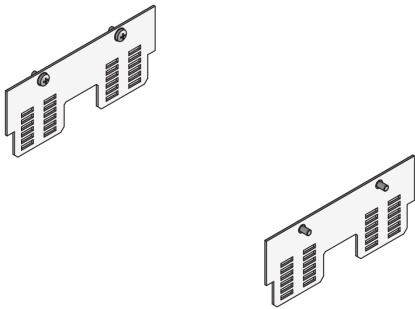

Snap-in ladder set for stainless steel unit, 2x, angular

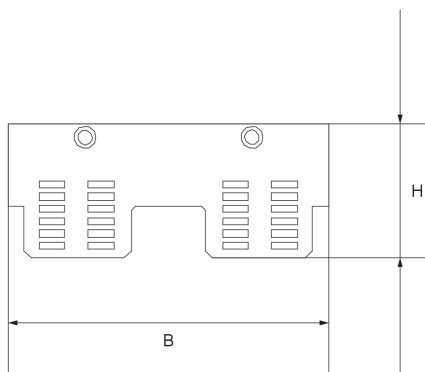

UGEAV2 components are snap-in ladder sets consisting of two individual snap-in ladders. They can be bolted to frames of levelling units for square stainless steel cartridges with cable outlets. The cartridges can then be fitted with up to two mounting boxes for installation devices. The snap-in ladder sets are made of sendzimir hot-dip galvanised steel (DIN EN 10346).
