

USSM

Overvoltage protection module class III/D/type 3

USSM components are class III/D/type 3 surge protection modules. The compact modules can be installed in mounting boxes and plugged into Schuko sockets via flexible connection cables 95 mm long with wire end sleeves. The protect against voltage surges from the mains supply. In addition, an acoustic defect alarm is activated in the event of an error. The surge protection modules are made of high-quality polyamide in red.

Artikel	Typ	connection cable	colour	W
