

UVS

Captive washer

The captive washer UVS facilitates the pre-assembly of screws. The UVS is pushed onto the screw thread and becomes wedged on the screw thread. The screw is thus pre-assembled and captive. The UVS is made of polyamide and is available for thread sizes M6, M8 and M10.

Artikel	Typ	t	D	Ø	W
UVS M10	captive washer UVS M10	2.10 mm	30 mm	10.5 mm	0.000 kg
