

WPBD

Wide-span bend cover

The wide-span bend cover WPBD is suitable for WPLB and WPRB wide-span bends and protects them from dirt, moisture and UV radiation. It is placed on top of the bend and secured with WPFDK or WPFDKA formed part cover clips. The latter are used if the cover is elevated. This improves the ventilation of the cables. The cover has a radius of 450 mm corresponding to the bend. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
