

WPFDKA 150

Formed part cover clamp, elevated

The formed cover clamp WPFDKA 150 is used to secure and elevate wide-span formed covers for improved ventilation of cables. It can also be used as a storm protection bracket. The number of cover clips depends on the number of holes in the formed part cover (see table). The filling volume of the tray remains unchanged. It is 150 mm long corresponding to the formed part rail height (without spacer sleeve) and is made of stainless steel.

Artikel	Typ	H	W
WPFDKA 150E	Fitting cover hook clip, elevated	150 mm	0.126 kg
