

WPRAA 150

Wide-span cable tray attachment branch, height = 150 mm

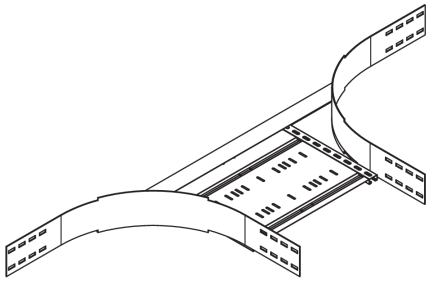

The wide-span cable tray attachment branch WPRAA 150 with integrated side connectors enables the direction of cable routing to be changed in the form of a branch. It is suitable for wide-span cable trays with rails 150 mm high and is 200 to 600 mm side. The side rail of the main tray is cut out at the point where the connecting tray will branch off. The WPRAA attachment branch is positioned and bolted in place at this point. The connection tray can then be pushed in with a VB floor connector. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
