

WPTR 120

Wide-span cable tray separating strip, height = 80 mm

Cables and lines with different functions or voltages can be routed separately from one another in the same wide-span cable tray by using WPTR 120 wide-span separating strip. The separating strip is bolted to the cable tray three times: at both ends of the separating strip and in the middle on the rungs or floor panel. The wide-span separating strip is 80 mm high and 3000 mm long. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
