

WPV 100

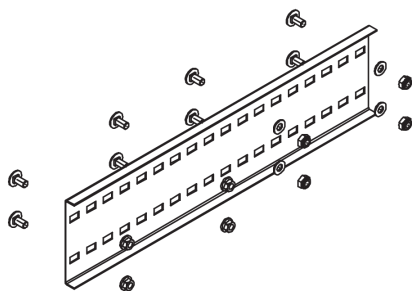

Wide-span cable tray connector, height = 95 mm

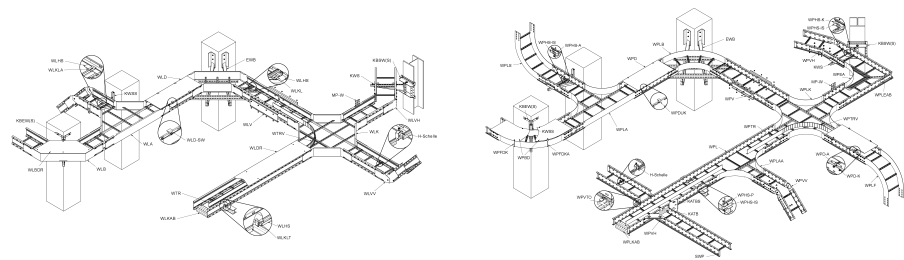

WPV 100 wide-span connectors can be used to connect wide-span cable trays or ladders together. They are 95 mm high corresponding to the height of the cable tray rail. One side of the connector is mounted as a floating bearing to allow for thermal expansion. The specified torques must be taken into observed. The other side of the connector is formed as a fixed bearing. A minimum distance of 4 mm must be maintained between the cable trays. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.
