
WPVV 120

Wide-span cable tray connector, vertical, height = 120 mm

WPVV 120 wide-span connectors can be used to connect wide-span cable trays or ladders together and to create vertical changes in direction. Both side connectors must be adjusted to the required angle and bolted in place on site before being installed. Use the slots for angles between 60 and 90°. The wide-span connectors are 115 mm high corresponding to the height of the cable tray rail. We provide components in various materials and surface finishes to ensure that various corrosion protection requirements for different areas of application are met.

Steel, pre-galvanised/Sendzimir process
